## App Overview

Akeneo PIM Connector for Shopify app transfers all the product data and assets from Akeneo PIM to Shopify stores automatically with just a few clicks. The tool is deployed on the Shopify side and leverages Akeneo and Shopify APIs, GraphQL, multi-threading and other architectural techniques to deliver superior performance.

Akeneo PIM Connector for Shopify is a unidirectional system, syncing data from Akeneo PIM to Shopify and no product data is sent back to PIM. Refer to our [Shopify to Akeneo Catalog Migration Tool](#) to transfer catalog data from Shopify to Akeneo PIM.

## Install & Connect App

### Akeneo App Store

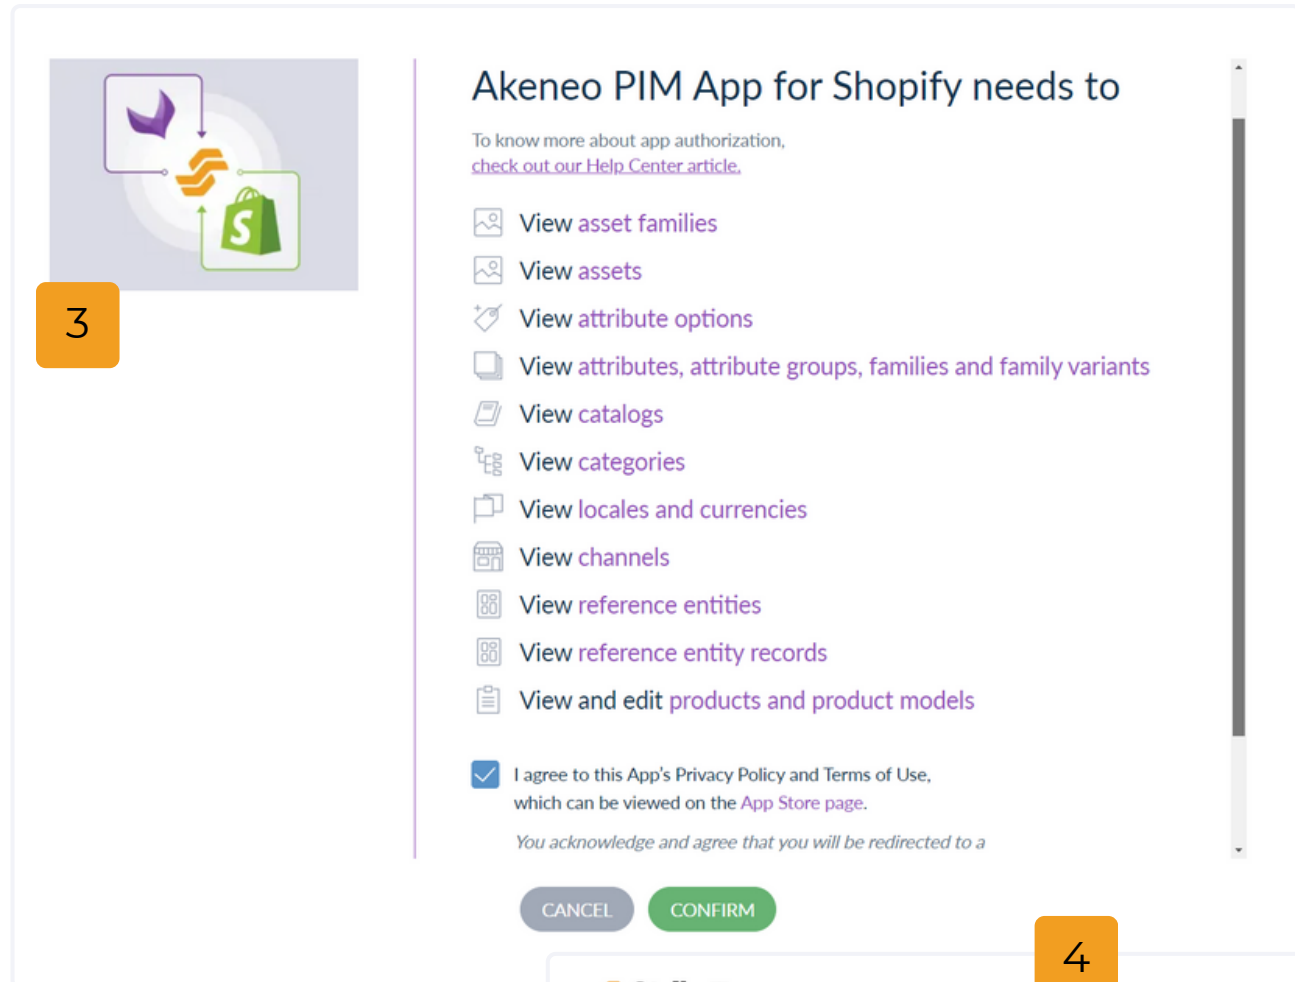

1. **Go to Akeneo App Store**, and **search** for "striketru" to find the [Akeneo PIM App for Shopify](#). **Click** on "Request more information" to fill out the form and our team will reach out to you.

OR

2. **Login** to your Akeneo PIM, **go to** "Connect" menu, and **click** on "app store". **Search** for "Shopify" to find the [Akeneo PIM App for Shopify](#). **Click** on "Connect" button to add the app to your Akeneo Instance. .

The screenshot illustrates the Akeneo App Store interface. On the left, a sidebar menu is visible with options like Data flows, App Store, Connection settings, and Connected Apps. The main content area displays the 'Akeneo PIM App for Shopify' listing, which includes a search bar, a 'Request more info' button, and three pricing tiers: Starter (\$149/mo), Basic (\$199/mo), and Professional (\$299/mo). The Starter plan includes 1,000 SKUs, Sync Products, Sync Variants, Sync Options, Sync Collections, Sync Attributes, Sync Product & Variant Metafield, and Sync Media & more... The Basic plan includes 1,000 SKUs, Sync Products, Sync Variants, Sync Options, Sync Collections, Sync Attributes, Sync Product & Variant Metafield, and Sync Media & more... The Professional plan includes 1,000 SKUs, Sync Products, Sync Variants, Sync Options, Sync Collections, Sync Attributes, Sync Product & Variant Metafield, and Sync Media & more... The listing also shows the app's version (1.0), update date (Jul 17, 2023), and publication date (Sep 29, 2022). Below the pricing tiers, there is a 'CONNECT / APP STORE' section with a search bar and a list of apps. The 'Akeneo PIM App for Shopify' is listed as the first app, with a 'CONNECT' button.

3. **Review** the authorization and agree to apps privacy policy and terms of use, then **click** on "Confirm" button to proceed.

5. Akeneo PIM App for Shopify will be added in your "Connected Apps" once you subscribe to a plan. To open the app, **click** on "Go to App" button.

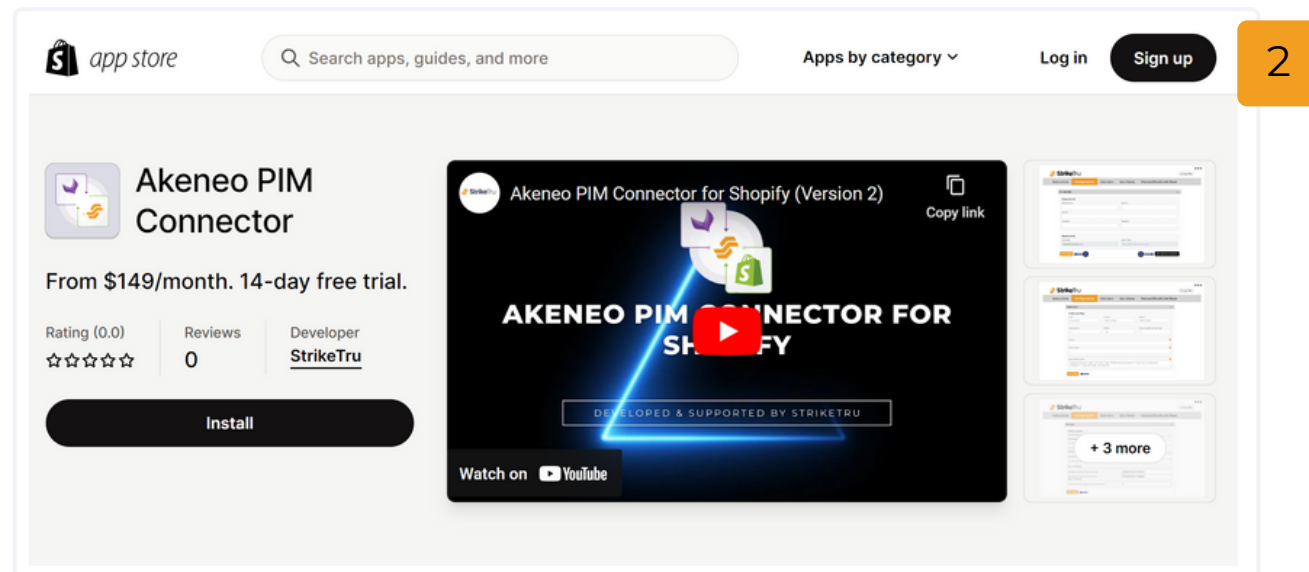

## Shopify App Store

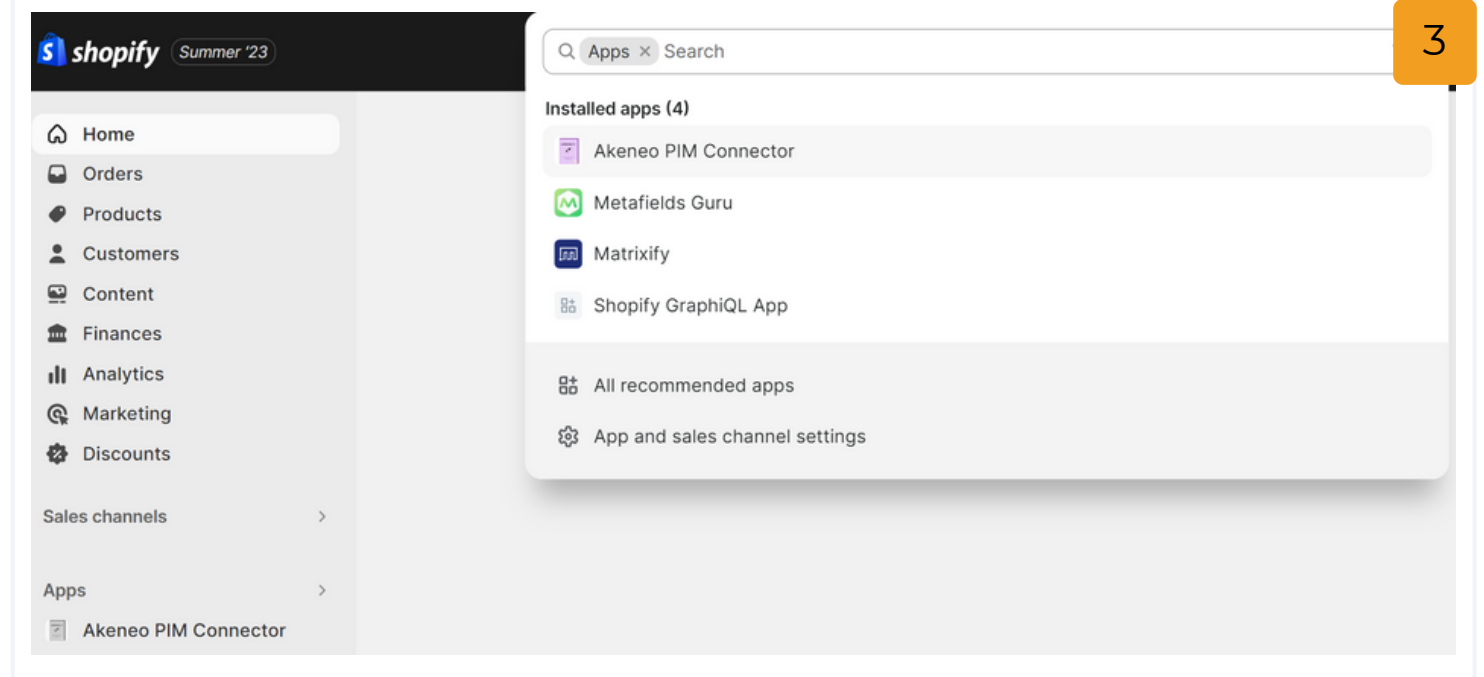

1. **Go to** [Shopify App Store](#), and **search** for "striketru" to find [Akeneo PIM Connector](#).

2. **Click** on "Install" button to add the app in your Shopify Store.

3. **Go to** apps menu and **click** on Akeneo PIM Connector to launch the app.

## Set-up Configurations

### A. Create an API Connection Between Akeneo and Shopify Connector>Configuration>Connection

1. **Create** a new connection using the instructions [here](#) or identify the existing one for the use of our connector

2. **Click** Configuration tab, and **open** in the app's Connection section.

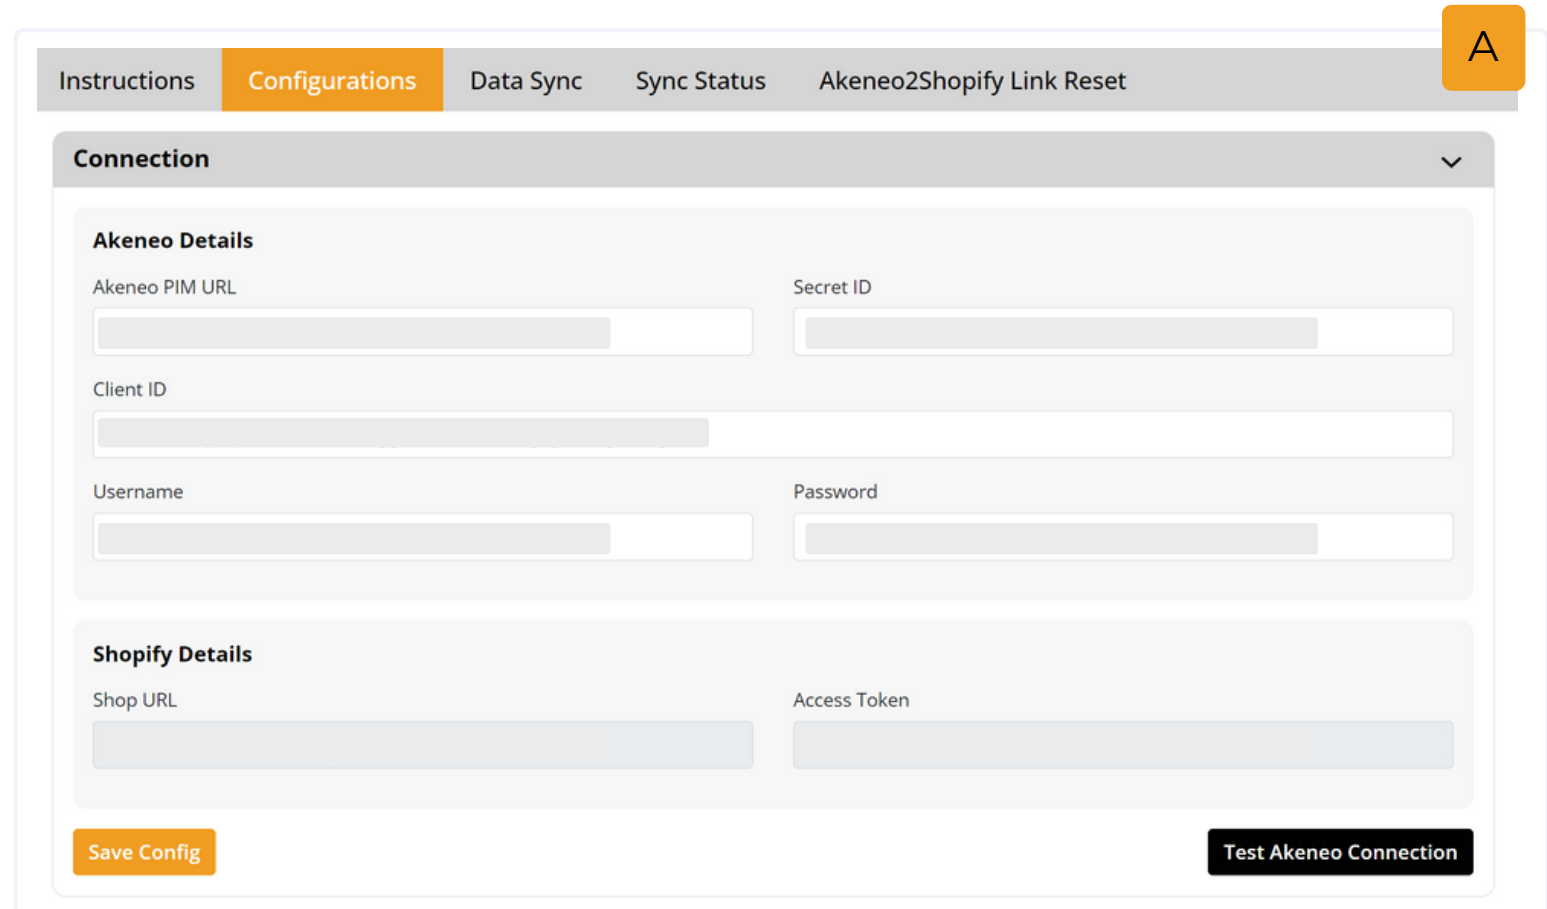

3. **Fill out** the API details for Akeneo & Shopify store.

**Enter Akeneo Details:** Akeneo PIM url, Secret ID, Client ID, User Name, Password

**Enter Shopify Details:** Shop URL, Access Token

4. **Click** on "Save Config" button to save your connections.

5. **Click** on "Test Connection" button to confirm your connection is successful.

## B. Define Data Filters

### Connector>Configuration>Data Filters

Define what products to import to Shopify from Akeneo PIM.

1. **Select** Locale to sync the products by language. (eg: en\_us)
2. **Select** Currency to syn products by currency. (eg: USD)
3. **Select** Channels to sync the products by channel such as website, catalog, mobile application. (eg: eCommerce)
4. **Type** the percentage in the Completeness field to sync products by completeness. (eg: 100%)
5. **Select** Yes or No in Enabled to sync products by status of a product. (eg: Yes)
6. **Type** number of days to indicate how often to sync product updates. (eg: 10)
7. **Type** product SKUs to sync specific products in bulk. **(Optional)** (eg: 12345, 98765)
8. **Type** Product Model SKUs to sync specific product models in bulk. **(Optional)** (eg: Shoes, Jeans)
9. **Use** JSON script to sync products/models based on advance search criteria. **(Optional)** ({"sku": [{"operator": "=", "value": "ISSD10BF"}]})
10. **Click** "Save Config" button to save your configurations.

**Note:** When using Products and Product Model filters, only the "Advanced Search (JSON)" filter will get overridden and the rest of the filters will work as expected in the app. If you would like to use the Products and Product Model filters keep the "Advance Search (JSON) filter empty and vice-versa.

### Data Filters B

### C. Map PIM Attributes To Shopify Fields

#### Connector>Configuration>Mappings

Map the Akeneo attributes that should be transferred to Shopify fields (product and variant attributes, image attributes, meta fields, and more.)

1. **Select** the Akeneo attributes from the drop-down in order to map them to the Shopify field under "Attribute Mappings".

**Note:** Title and Description are the only mandatory fields.

2. **Select** the attributes to be used as images under "Image Mappings".

3. **Select** the attributes to be used as meta fields under "Meta Field Mapping".

**Note::** You can select multiple attributes to be synced as Product Meta fields and Variant Meta fields.

4. Choose to import images or not during the sync by **selecting** Yes or No under "Additional Mapping" accordingly.

5. **Click** "Save Config" button to save your configurations.

**Note:** Not all fields are shown in the screenshot for product mapping.

## Sync Categories & Products

### A. Sync Category Data

#### Connector > Data Sync > Category (Collection) Sync

1. **Go to** Data Sync tab, and **open** "Category (Collection) Sync" section.

2. **Click** on "Sync Categories" button to start the category import.

**Note:** Sync categories before products when using the app for the first time.

3. A Request ID will be generated. **Click** on the ID to review the category sync progress.

### B. Sync Product Data

Connector > Data Sync > Product Sync

1. **Go back to** Data Sync tab, and **open** "Product Sync" section.

2. **Click** on "Sync Products" button to start the product import.

3. A Request ID will be generated. **Click** on the ID to review the product sync progress.

## Sync Status Dashboard

You can review the details of all the syncs, download error logs or cancel the sync job in-progress.

Connector > Sync Status

**Dashboard has the following fields:**

- **ID:** Request ID that denotes the respective sync statuses
- **Type:** Type of sync - category, product and image
- **Status:** Started, In-Progress, Completed and Completed with Error

- **Details:** Count of the categories, products, variants and images that are synced to Shopify (image count, category count, product count and variant count)
- **Start time & End time:** Time when the sync started and completed
- **Errors:** Click "Download" button to obtain an error report, if any
- **Action:** An option to abort the sync from execution. **Click "X"** icon to abort the sync in-progress.

### Dashboard Actions

1. **Click** "Refresh Icon" at the top right-hand corner to refresh the dashboard.  
**Note:** Status is refreshed automatically for every 10 seconds.

2. **Click** on the "X" red button under Action column to abort the associated sync job.

3. **Click** "Download" button to download an error report. Errors during the sync for category, products, product variants and images will be on the report.

## Reset Akeneo To Shopify Link

If you must delete a collection or a product in Shopify, follow this process so you can successfully re-sync that product from PIM into Shopify.

### Connector > Akeneo2Shopify Link Reset

#### A. Deleting A Shopify Collection

1. **Go to** "Akeneo2Shopify Link Reset" tab and **click** on the "Category Reset" section. Enter the ID of the Shopify Collection you want to delete. You may enter multiple Collection IDs as a comma-separated list of IDs.

Instructions   Configurations   Data Sync   Sync Status <b>Akeneo2Shopify Link Reset</b> <span style="float: right;">1 </span>	
Enter a Product ID and hit Reset Product Link and it will delete a product in Shopify. Enter a Category ID (i.e. Collection) in Shopify and hit Reset Category Link and it will delete a category in Shopify. This will ensure the product or category can be synced from Akeneo to Shopify without errors.	
<b>Product Reset</b> <span style="float: right;">^</span>	
<b>Category Reset</b> <span style="float: right;">1 ^</span>	
Shopify Category ID (Comma separated)	
<input type="text" value="7721434054825,7721434022057"/>	
<b>Reset Category Link</b>	2

2. **Click** "Reset Category Link" button. This will delete the specified categories in Shopify and also the associated connector link entries. Now you may successfully re-sync that category from PIM into Shopify again without errors.

**B. Deleting A Shopify Product**

1. **Go to** "Akeneo2Shopify Link Reset" tab and **click** on the "Product Reset" section. Enter the ID of the Shopify Product you want to delete. You may enter multiple Product IDs as a comma-separated list of IDs.

2. **Click** "Reset Product Link" button. This will delete the specified products in Shopify and also the associated connector link entries. Now you may successfully re-sync that category from PIM into Shopify again without errors.

**Known App Limitations**

- Supports up to 10 meta fields per product

**Appendix: Supported Data Types & Attribute Mapping Chart**
